**Total Errors** 

176K

Accepted Errors ?

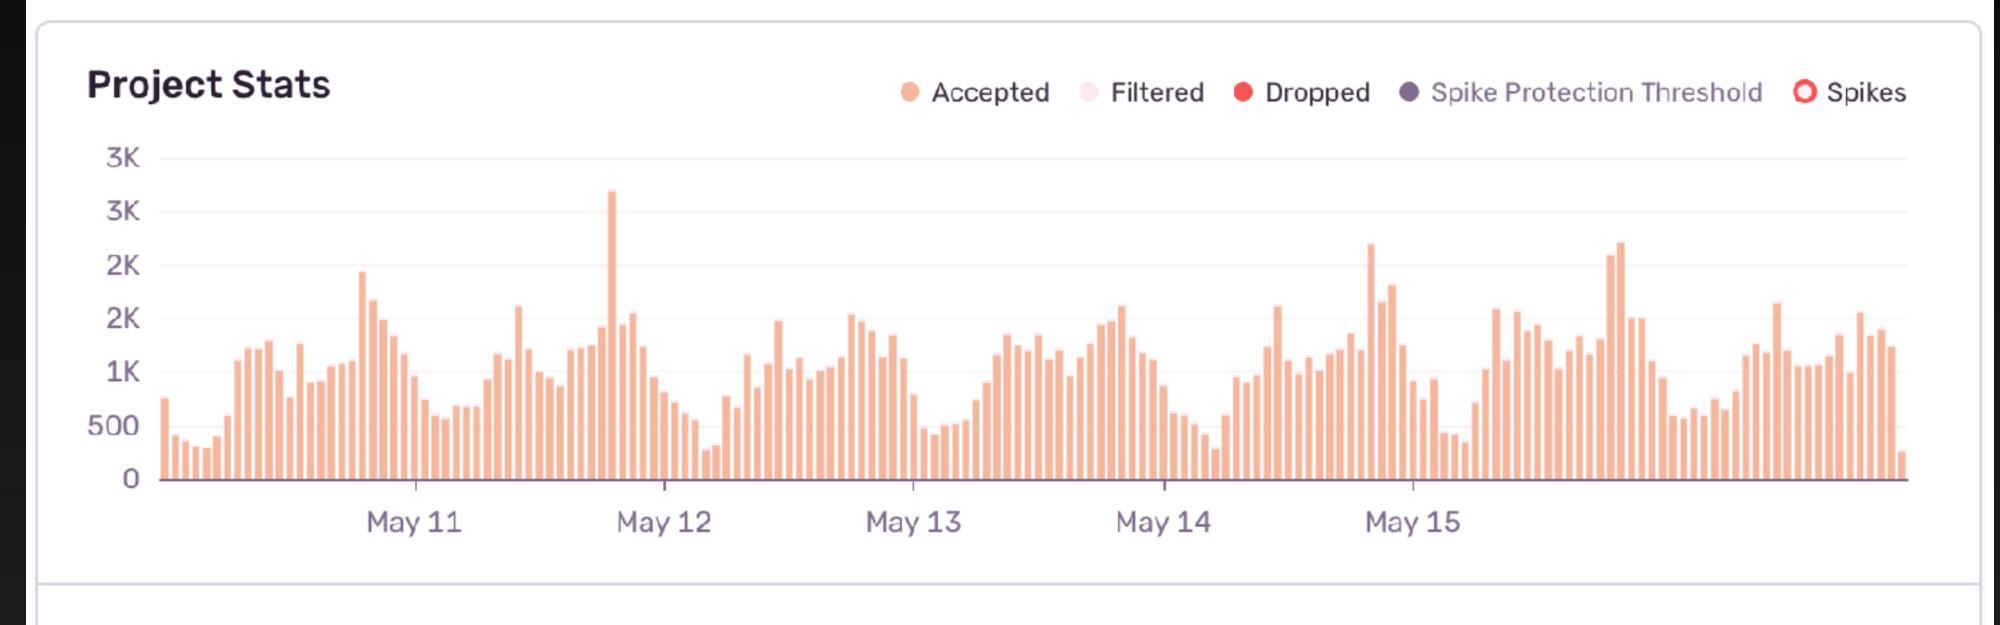

176K <sub>12 in last min</sub>

Filtered Errors ②

0

**Dropped Errors** ?

0

Date Range: May 10 12:00 PM - May 17 12:00 PM (-07:00 UTC, 1h interval)

Type: Periodic ∨

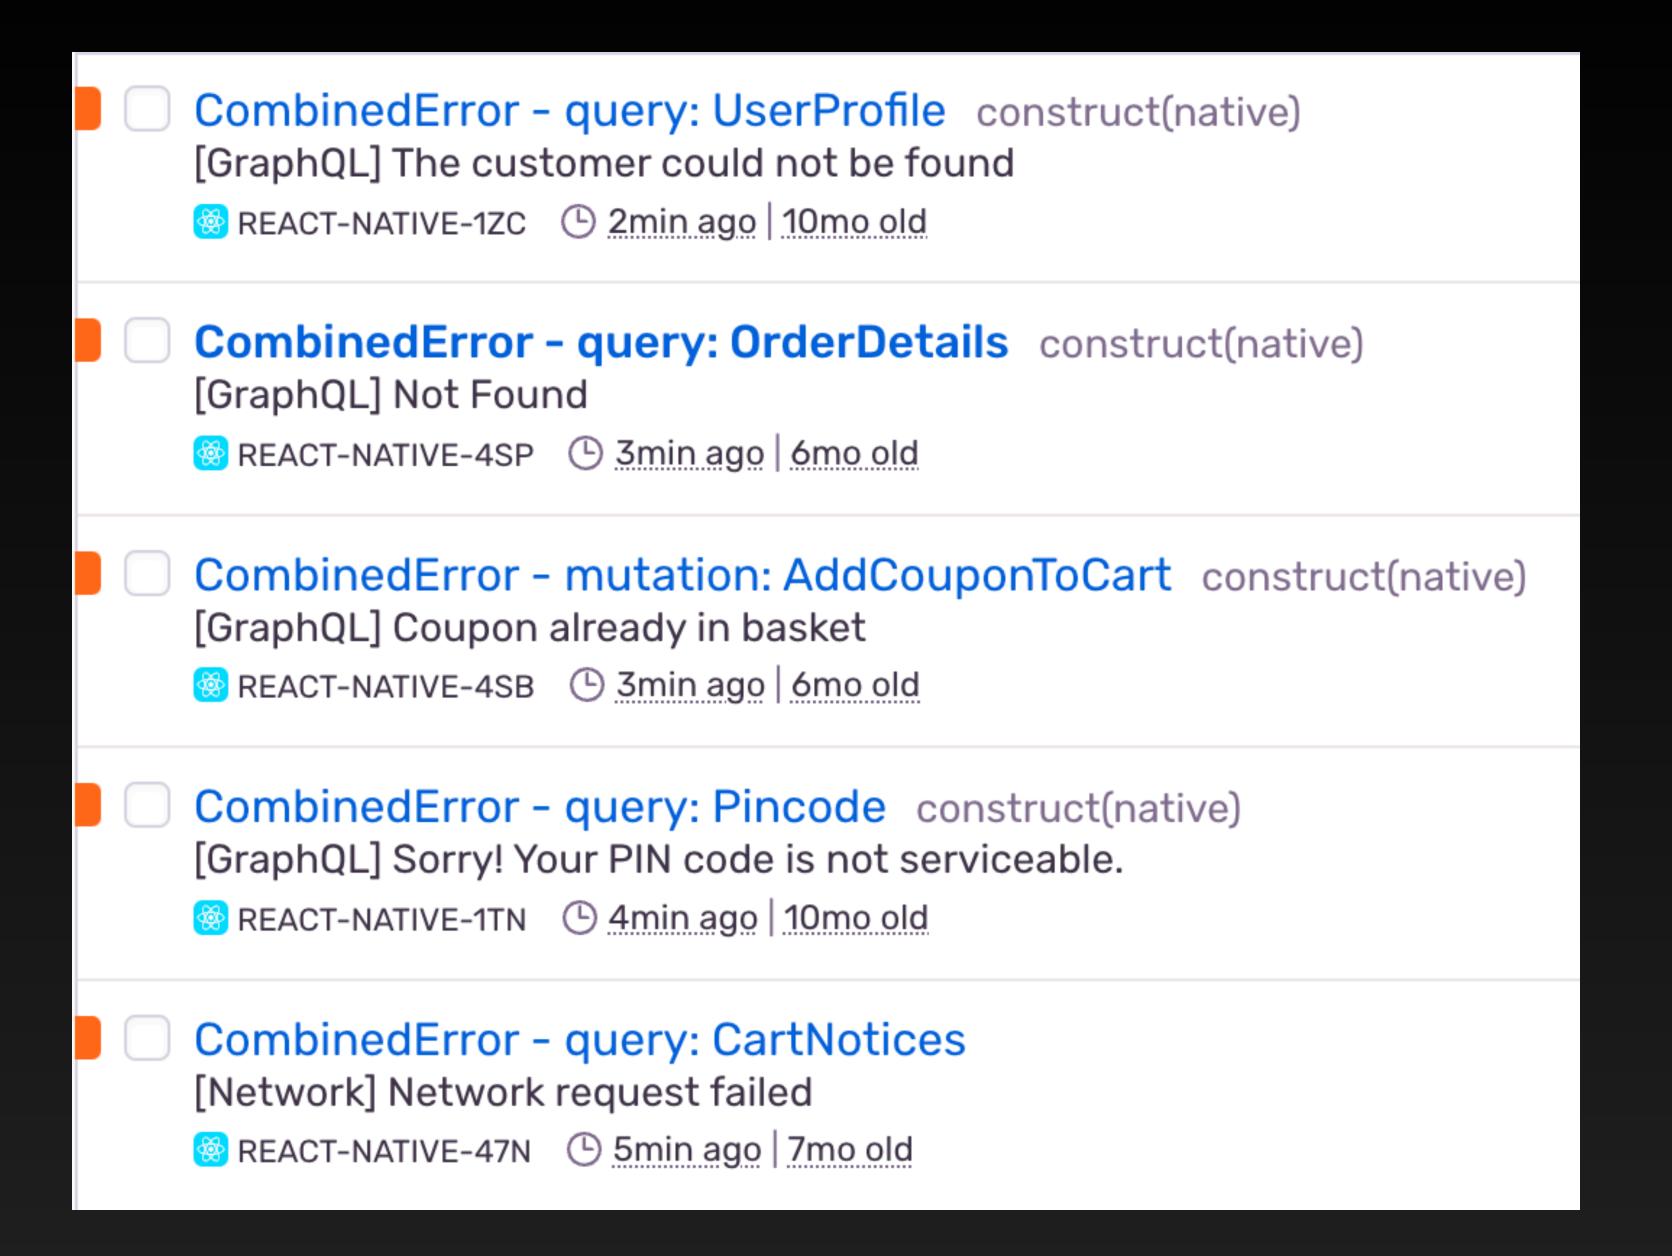

```
error.name = `${error.name} - ${operation.kind}: ${queryName}`;
Sentry.captureException(error, {
  fingerprint: [operation.kind, queryName, errorCode |  ''],
  tags: {
    exception_source: 'qraphql_error',
    query_name: queryName,
    operation_kind: operation.kind,
    error_code: errorCode,
```

```
error.name = `${error.name} - ${operation.kind}: ${queryName}`;
Sentry.captureException(error, {
  fingerprint: [operation.kind, queryName, errorCode
  tags: {
    exception_source: 'qraphql_error',
    query_name: queryName,
    operation_kind: operation.kind,
    error_code: errorCode,
```

```
error.name = `${error.name} - ${operation.kind}: ${queryName}`;
Sentry.captureException(error, {
 tags: {
   exception_source: 'qraphql_error',
   query_name: queryName,
   operation_kind: operation.kind,
   error_code: errorCode,
```

#### **FINGERPRINT RULES**

error.type:"i0" -> i0

This can be used to modify the fingerprint rules on the server with custom rules. Rules follow the pattern matcher:glob -> fingerprint, values. To learn more about fingerprint rules, read the docs.

# force all errors of the same type to have the same fingerprint

error.type:DatabaseUnavailable -> system-down

```
# force all memory allocation errors to be grouped together stack.function:malloc -> memory-allocation-error

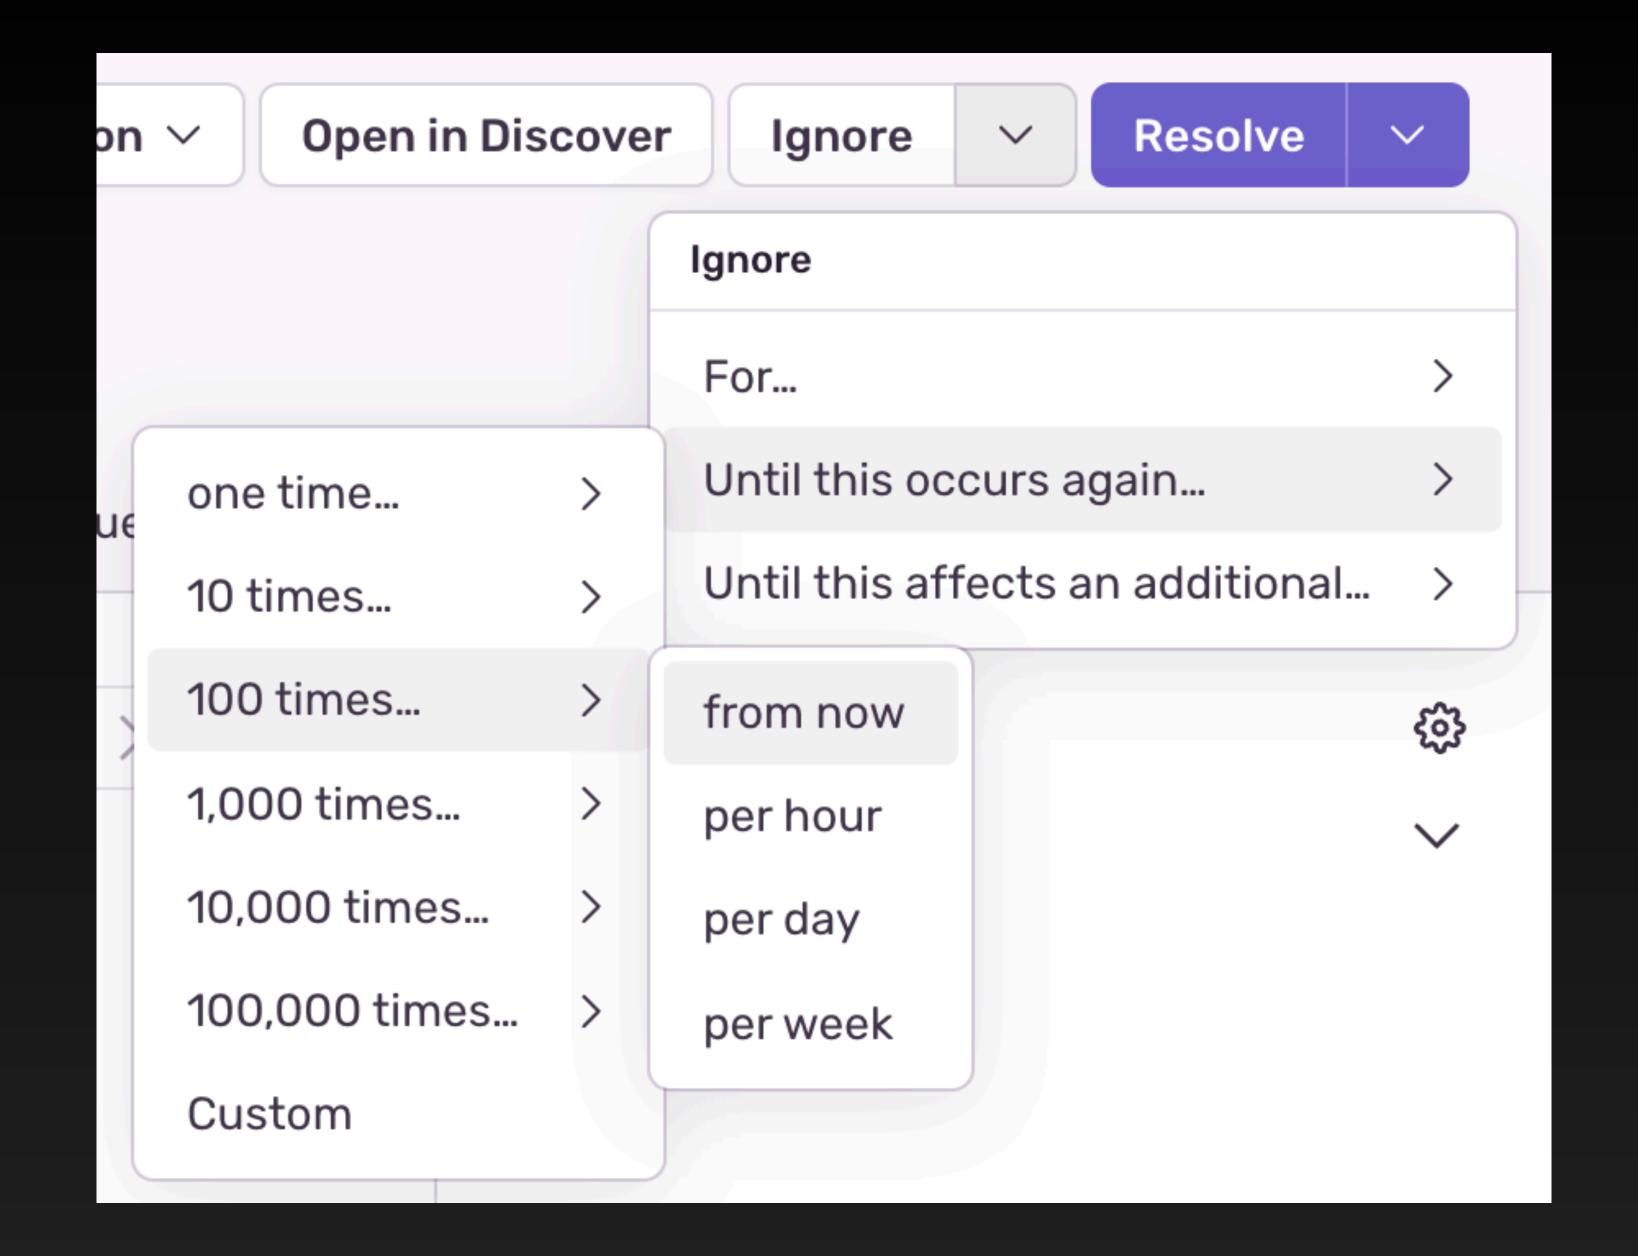

error.type:OutOfMemoryError message:"Failed to allocate a *" -> OutOfMemoryError-failed-to-allocate error.type:EXC_BAD_ACCESS -> EXC_BAD_ACCESS error.type:SIGABRT message:"*heap corruption detected*" -> SIGABRT-heap-corruption-detected error.value:"Application Not Responding*" -> Application-not-responding error.type:"App Hanging" -> App-hanging error.type:IllegalArgumentException message:"pointerIndex out of range" -> IllegalArgumentException-pointerIndex-out-of-range error.value:"[Network] Same machine same service in the most recent hop on cache*" -> Same-machine-same-service-in-the-most-recent-hop-on-cache error.type:CppException message:"bad_weak_ptr" -> CppException-bad_weak_ptr
```

error.value:"invalid pointerIndex -1 for MotionEvent\*" -> Invalid-pointer-index-MotionEvent

message: "Unknown block type \*undefined\*" -> Unknown-block-type-undefined

#### Lesson 5

Learn to Profile

- Roll out releases gradually
- Proactively monitor and manage error tracking
  - Create the tooling you need
    - Invest in accessibility
      - Learn to profile

#### Thanks for listening

You can find all the links on my website and on Twitter
